To generate a PDF of a resume, you will need to create the resume content first. Here's a general outline:

1. Contact Information 2. Professional Summary/Objective 3. Education 4. Work Experience 5. Skills 6. Achievements/Awards 7. Volunteer/Relevant Extracurricular Activities 8. Relevant Tools/Software Proficiency 9. Relevant Projects 10. References (optional)

You can use a word processor like Microsoft Word, Google Docs, or any other text editing software to create your resume. Once you have created your resume, you can save it as a PDF file.

If you want, I can provide you with a basic template for a resume. Please let me know what kind of resume you are looking for (e.g., student, professional, fresher, etc.) and what format you prefer (e.g., one-page, two-page, etc.).
